

I am writing to you to inform you that I pay for and listen to Satellite Radio. I thoroughly enjoy the ability to receive radio with quality and variety that are not available elsewhere. I live in the Adirondack Mountains and what few radio stations I can receive have poor quality. I enjoy being able to travel cross country and have an uninterrupted selection of channels to listen to and the ability to receive local weather and traffic immediately without having to be distracted from my driving searching for a radio station that might be broadcasting this information. I respectfully urge the FCC to reject the NAB' petition 04-160 and to support satellite radios ability to provide entertainment, news and information in a format not available on radio.

Thank you

Stuart Chapman
